Habets, P. A. M. (2011). *The role of neuroimaging phenotypes in ecogenetic studies of psychotic disorder*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20110701ph>

Document status and date:

Published: 01/01/2011

DOI:

[10.26481/dis.20110701ph](https://doi.org/10.26481/dis.20110701ph)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Stellingen behorend bij het proefschrift:

The role of neuroimaging phenotypes in ecogenetic studies of psychotic disorder

1. Verschillen in dikte van de cerebrale cortex zijn het resultaat van de dynamische interactie tussen genen en omgeving (dit proefschrift).
2. Of corticale dikte een intermediair fenotype is voor psychotische stoornis is nog steeds onder debat (dit proefschrift).
3. Cannabis gebruik en trauma in de kindertijd zijn niet alleen geassocieerd met een verhoogd risico op een psychotische stoornis maar ook met de hersenveranderingen gezien in patiënten met een psychotische stoornis (dit proefschrift).
4. Hogere hypofyse en lagere hippocampus volumes zijn betrokken bij een verhoogde gevoeligheid voor stress in patiënten met een psychotische stoornis (dit proefschrift).
5. In schizofrenie onderzoek staat de hoeveelheid structurele imaging studies in schril contrast met het aantal consistente bevindingen.
6. In one case out of a hundred a point is excessively discussed because it is obscure; in the ninety-nine remaining it is obscure because it is excessively discussed (Edgar Allan Poe).
7. Moeilijk gaat ook (Marleen Vanden Ecker).
8. Fear will pass, regret sticks.
9. Sanity is in the eye of the beholder.
10. While we try to teach our children all about life, our children teach us what life is all about (Angela Schwindt).
11. De bescheiden Belgen kunnen nog wat leren van de assertieve Nederlanders, en vice versa.
